Capital Markets

- ❖ The Dow Jones Wilshire 5000 index lost -2.0% bringing the 1 year return to 9.9%.
- ❖ Large cap (Russell 1000) lost -1.7 but still outperformed small cap, as measured by the Russell 2000 by almost 3.5%. However, small cap continues to outperform large cap for the 1, 3, 5, and 10 year.
- ❖ This quarter value outperformed growth (0.3 versus -4.2%) using the Russell 3000 series.
- ❖ For the fourth quarter in a row earning 0.2%, the international equity market, as measured by the MSCI ACWI ex U.S., outperformed the U.S. equity market. Of the 47 countries in the MSCI ACWI ex U.S. Index, only 18 countries had positive returns for the quarter in U.S. dollars. The lowest and highest returning markets were both emerging countries (Colombia at -31.4% and Peru at 15.3%). The best performing developed country was the UK at 4.9% and the worst was New Zealand at -7.5%.
- ❖ In the Lehman indices, commercial mortgage backed securites (non-ERISA) had the highest return for the quarter earning 0.5%. For the year U.S. emerging markets (excluding U.S. aggregate) was the top performer earning 8.1%. For the quarter and year, the short end of the curve outperformed the long end. For the quarter, the 3 month T-Bill earned 1.2% and the 30 year Treasury Bond losing 3.2%.
- ❖ For the second quarter of 2006, the best performers in the NCREIF were hotel, at 6.3%, and the Western region, at 4.8%. Total return for the index was 4.0%.
- ❖ GDP was 2.9% for the quarter. Inflation, as measured by CPI, was up 1.3%.
- ❖ The Fed raised the federal funds rate 25 basis points two times during the quarter, increasing the rate from 4.75% to 5.25%.

Total Fund

- ❖ The CTF increased in size during the quarter growing approximately \$196 million to over \$53.8 billion.
- ❖ Since the beginning of the fiscal year the fund has increased by almost \$6.4 billion.

Asset Allocation

- ❖ All asset classes in the CTF are within their new long-term target ranges. \$225 million was taken from U.S. Equity and \$575 million was taken from International Equity. Of that amount, \$600 million was transferred to Fixed Income. The remainder plus net transfers from Private Equity and Real Estate went to cash to fund participant withdrawals.

Investment Return

- ❖ The CTF's return for the second quarter of 2006 was 1.0% and outperformed all benchmarks for the quarter. All annualized returns shown (1, 3, 5, and 10 year) exceed the actuarial assumption of 8%.
- ❖ The fund outperformed all benchmarks for all periods.

U.S. Equity

- ❖ The WSIB U.S. equity portfolio slightly outperformed the Dow Jones Wilshire 5000 for the quarter but underperformed it by 2 basis points for the year.
- ❖ The passive index manager (BGI) underperformed its benchmark for the quarter but outperformed it for the year. 2 of the 3 enhanced managers outperformed their benchmark for the quarter. The total U.S. enhanced equity outperformed the D.J. Wilshire 5000 by over 30 basis points.

International Equity

- ❖ The WSIB International equity portfolio underperformed the benchmark for the quarter and for all the longer time periods.
- ❖ 4 of the 10 developed managers outperformed for the quarter, 7 of them outperformed for the year. Both SsgA and Mondrian outperform for the 3 and 5 year.
- ❖ 2 of the WSIB's 5 emerging markets managers outperformed the benchmark for the quarter. Both legacy managers outperformed for the year. GMO has outperformed the benchmark in all time periods.

Fixed Income

- ❖ Fixed income outperformed the Lehman Universal by 18 basis points for the quarter and continues to outperform both the Lehman Universal and the Aggregate for all other time periods.

Private Equity

- ❖ The WSIB private equity return for the second quarter was 5.6%. The 1 year return was 39.5%, higher than the benchmark, S&P 500 plus 500 basis points (lagged one quarter), at 16.7%.
- ❖ The WSIB LP portfolio returned 6.3%, and the WSIB KKR portfolio returned 3.4% for the quarter.
- ❖ As of March 31, 2006, there was more than \$5.2 billion in unfunded commitments.

Real Estate

- ❖ The WSIB Real Estate return for the second quarter was 5.6%, higher than the NCREIF (lagged on quarter) plus 100 basis point index of 3.9%. For the 1 year period, the return of 24.3% was over 300 basis points above the NCREIF (lagged one quarter) plus 100 basis point index of 21.2%.
- ❖ As of March 31, 2006, there were \$5.4 billion in unfunded commitments.

Jun-04

Jun-05

Jun-06

Yearly Cash Flow History*

Monthly Cash Flow History*

* Only includes new cash to/from the portfolio; does not include DB/DC transfers between Plan 2 and Plan 3 that stay inside the CTF. Numbers are historical and are not indicative of future transfers.

Indexed

Barclays Global Investors (BGI)

BGI manages the bulk of the defined benefit retirement U.S. equity assets in a passive commingled trust designed to correspond to the Dow Jones Wilshire 5000 Index. BGI has managed funds for the WSIB since 1982.

Enhanced Indexed

Barclays Global Investors (BGI)

BGI provides the WSIB with an enhanced index equity commingled fund, the Russell 3000 Alpha Tilts Strategy. This strategy is a bottom-up, style-neutral quantitative strategy designed to outperform the Russell 3000 Index by 30 to 80 basis points net of fees on a rolling three year average, while incurring a low level of risk of 1 percent or less. BGI's Alpha Tilts investment philosophy holds that superior investment outcomes are most reliably reached through Total Performance Management, the management of return, risk, and cost. They believe that markets are not perfectly efficient and that misvaluations can be used to systematically add value over time. The WSIB has invested in the Russell 3000 Alpha Tilt strategy since December 2005.

State Street Global Advisors (SsgA)

SSgA manages a U.S. enhanced index equity account, the Russell 3000 Index Plus Strategy. This strategy employs a quantitative, style neutral, beta neutral and capitalization neutral investment process that seeks to outperform the Russell 3000 Index by 75 to 125 basis points gross of fees over a typical market cycle while exhibiting similar characteristics to the benchmark and a targeted tracking error of 150 basis points. The Russell 3000 Index Plus Strategy seeks to add value by selecting the best stocks and industries within the Russell 3000 Index. These evaluations are applied within a risk controlled framework to construct portfolios that provide core equity exposure and closely track the benchmark. The WSIB has invested in the Russell 3000 Index Plus Strategy since December 2005.

Western Asset Management Company (WAMCO)

Western Asset Management Company actively manages an enhanced index portfolio for the WSIB. The portfolio is based on a synthetic strategy that uses futures to track the S&P 500 index, and invests the uncommitted cash in a basket of actively managed short-term fixed-income securities. The firm's sole business is managing fixed-income portfolios for large institutional clients, an activity it has pursued for over 30 years. The WSIB portfolio has been managed by Western Asset since January 2006.

Indexed

State Street Global Advisors (SsgA)

It is the policy of WSIB to manage a portion of the International developed markets portfolio in a low cost broad based index fund. Accordingly, SSgA manages a replicated commingled index fund on behalf of the WSIB that is designed to passively track the MSCI EAFE plus Canada Indexes (which are the most widely-accepted index proxies for developed markets equities). The WSIB has been using SSgA's MSCI EAFE + Canada Fund since 1994.

Enhanced Indexed

Barclays Global Investors (BGI)

BGI provides an international developed markets enhanced index equity product, the World ex-U.S. Alpha Tilts Strategy, designed to outperform the MSCI World ex-U.S. Index by 1 to 2 percent. Because the markets are not perfectly efficient and that misvaluations can be used to systematically add value over time. The WSIB has invested in the World ex-U.S. Alpha Tilts Strategy since June 2004.

Goldman Sachs Asset Management (GSAM)

GSAM manages an international developed markets enhanced index equity portfolio using a combination of traditional fundamental analysis and quantitative modeling to add value from diversified sources of return such as country, currency selection, and individual stock selections. They expect to outperform the MSCI World ex-U.S. Index by 75 basis points net of fees on a rolling three year average, while incurring a low level of risk of 2 percent or less. GSAM has been managing the enhanced index portfolio for the WSIB since June 2004.

Active Developed Markets

Arrowstreet Capital, L.P

Arrowstreet actively manages an international developed markets equity "core" portfolio. The investment team continually monitors the current market factors and conditions and incorporates new investment insights and information as markets evolve. The WSIB portfolio has been managed by Arrowstreet since June 2004.

Capital Guardian Trust Company

Capital actively manages an international developed markets equity "core" portfolio. The firm conducts extensive fundamental research and uses a system of multiple managers to manage individual segments of the portfolios. The WSIB portfolio has been managed by Capital since June 2004.

Fidelity Management Trust Company (FMTC)

Fidelity actively manages an international developed markets equity "core" portfolio. The firm covers 80-90 percent of the MSCI EAFE + Canada benchmark and does not pre-screen for size, style, or other characteristics. The WSIB portfolio has been managed by FMTC since June 2004.

LSV Asset Management

LSV actively manages an international developed markets equity "value" portfolio. The strategy's primary emphasis uses quantitative techniques to select individual securities. A risk control discipline limits the over- or under-exposure of the portfolio to industry concentrations. Value factors and security selection dominate sector/industry factors in driving performance. The WSIB portfolio has been managed by LSV since August 2004.

Mondrian Investment Partners Limited

Mondrian actively manages an international developed markets equity "value" portfolio. They identify value investments using a dividend discount-valuation model of future income streams with a top-down country allocation overlay that helps structure the portfolio. The WSIB portfolio has been managed by Mondrian since June 1999.

Active Developed Markets Continued

Julius Baer Investment Management (JBIM)

JBIM actively manages an international developed markets equity "growth" portfolio. The international equity team's research process is primarily based on fundamental assessment of companies, sectors, and macroeconomic influences on regions and countries. Country allocations are a result of the security selection process. The WSIB portfolio has been managed by JBIM since June 2004.

William Blair & Company (WB)

WB actively manages an international developed markets equity "growth" portfolio, which focuses on companies with above-average growth prospects that can be sustained through leading or franchise positions in terms of proprietary products, marketing dominance, or cost/asset base advantage. The WSIB portfolio has been managed by WB since June 2004.

Active Emerging Markets

Capital International, Inc.

Capital manages an active emerging markets equity portfolio, which is divided into smaller asset portions. This enables several key decision makers to work on each account and make decisions as to individual security, country and industry selection, timing, and percentage. The WSIB portfolio has been managed by Capital since the middle of the second quarter of 2001.

J.P. Morgan Asset Management (JPMAM)

Global Emerging Markets Focused strategy is a concentrated, bottom-up investment discipline that seeks to add alpha through superior stock selection based on fundamental research. The strategy typically holds between 50 and 75 securities. Investments are made with a long-term, low-turnover focus. Deviations from the benchmark are closely monitored and managed as JPMAM believes that risk control is best practiced by building a portfolio of independent bets, to insure that no one position can derail performance and that there are no unintended "themes" in the portfolio. JPMAM began managing assets for the WSIB in April 2006.

Lazard Asset Management LLC (Lazard)

Lazard's Emerging Markets Equity product is an actively managed strategy that follows a strict bottom-up, relative value investment philosophy that focuses on the tradeoff between valuation and financial productivity. The process begins with a database screening, followed by accounting validation, then fundamental analysis and finally portfolio construction and risk control, which takes into account macro economic risks, portfolio concentration risk, political risk and corporate governance risk. Strict country and sector limits are also in place to limit exposures. The strategy is focused on security selection, where the majority of the added value has been derived from historically. Lazard began managing assets for the WSIB in April 2006.

Grantham, Mayo, Van Otterloo (GMO)

GMO manages an active emerging markets portfolio for the WSIB. GMO uses a quantitative investment process. Top-down country allocation is based on market valuations, macroeconomic fundamentals, relative performance, stock valuation, and subjective judgment. The stock selection process utilizes a model that is customized for each country and incorporates three factors: value, neglect, and momentum. GMO seeks to invest in cheap countries, sectors, and stocks so its portfolios generally exhibit P/E ratios below those of the index benchmarks. The WSIB has been invested in GMO's Emerging Market Strategy Fund since the fourth quarter of 1996.

Pictet Asset Management (Pictet)

Pictet employs a bottom-up method to invest in emerging markets. Pictet defines value principally in terms of productive assets. The majority of Pictet's time and resources are focused on identifying and appraising undervalued shares according to their proprietary valuation approach. All research and recommendations are conducted in-house based on the same valuation principles. As a control mechanism, Pictet operates a strict macroeconomic risk overlay in the investment process. The final portfolio consists of around 150-200 stocks. Pictet began managing assets for the WSIB in April 2006.

Asset Allocation Policy

The targets will adjust annually toward the long-term asset allocation policy, which is 23 percent U.S. equity, 23 percent non-U.S. equity, 25 percent fixed income, 17 percent private equity, and 12 percent real estate. The interim target for 2006 is 24.5 percent U.S. equity, 23 percent non-U.S. equity, 27.5 percent fixed income, 15.5 percent private equity, and 9.5 percent real estate.

CTF (Commingled Trust Fund)

The investment trust fund that pools the assets of most of the Washington State retirement funds to permit more efficient management and to reduce administrative costs. The retirement accounts included in the CTF are: PERS 1, 2 & 3; TRS 1, 2 & 3; LEOFF 1 & 2; SERS 2 & 3; WSPRS 1 & 2; and Volunteer Firefighters. Starting in July 2006 there will be a new fund, PSERS 2.

Passive Benchmark

The Passive Benchmark is currently 52 percent Dow Jones Wilshire 5000 Index, 25 percent Lehman Universal Index, and 23 percent MSCI ACWI ex U.S. The percentages have changed as the portfolio was rebalanced to meet the target asset allocation policy. This portfolio is a 'passive' representation of the CTF.

Implementation Value Added

The objective is to exceed the return of the custom benchmark consisting of the public market indices, as defined in each asset class's policy, weighted according to the asset allocation targets. This custom benchmark differs from the passive benchmark as it is not an investable benchmark due to the uninvestable premium added to the real estate and private equity passive benchmarks.

TUCS Public Fund > \$1 Billion Median

Trust Universe Comparison Services median return of other public funds. There are currently 65 funds in the universe with a median asset size of slightly over \$9.3 billion.

TUCS Public/Corporate Fund > \$1 Billion Median

Trust Universe Comparison Services median return of corporate and public funds. There are currently 168 funds in the universe with a median asset size of approximately \$3.2 billion.
